

STEAM EDUCATION SPONSORSHIPS

The Idaho Environmental Coalition recognizes its role as a contributing partner in the community it serves. This policy outlines guidelines and procedures to help facilitate IEC's response to the many requests for charitable donations, event sponsorships, and in-kind requests received annually from the surrounding communities.

IEC supports STEAM education in local schools. IEC STEAM Grants are awarded annually to teachers for STEAM projects happening in their classrooms. Grants range from \$200 - \$5,000, depending on the scope and impact of the project.

Past STEAM funding requests include:

- Chromatographs
- Books
- Fluid dynamics experimentation
- Rocket construction
- Visual aids for mathematics
- Robotics equipment
- Videography software
- Classroom science experiments

Any teacher in the IEC service area is encouraged to apply. Please submit requests in writing using the IEC Community Sponsorship donation Request Form found on our website at idahoenvironmental.com
